

Build with the contractor from the *first sketch.*

Share plans early and get a conceptual budget back, so design decisions are made with real numbers. Southeast Fort Lauderdale.

01

Budget in step with design

Early budgeting and scope development help your client choose with the numbers in front of them, before construction begins.

02

Coordinated, start to finish

Architects, designers, engineers, permitting, trades, scheduling and selections, managed as one project.

03

Direct accountability

Direct involvement from Michael Johnson, from early planning and preconstruction through completion and closeout.
